5.	a)	Read the following extract and answer the questions given below- Diet plays a vital role in the maintenance of good health and in the prevention and cure of disease. The human body builds up and maintains healthy cells, tissues, glands and organs only with the help of various nutrients. The body cannot perform any of its function be they metabolic, hormonal, mental, physical or chemical without specific nutrients. The food which provides these nutrients is thus one of the most essential factors in building and maintaining health. Nutrition, which depends on food, is also of utmost importance in the cure of disease. The primary cause of disease is a weakened organism or lowered resistance in the body, arising from the adoption of a faulty nutritional pattern. There is a mechanism within the body but it can perform its function only if it is sufficiently supplied with all the essential nutritional factors.	(12)
